

Stamped Designs Winter Wonder Class

Peace Card

Copic markers used: YG61/63, E43/44, N10

1. Color the trees and the lamp post with the Copic markers listed or the coloring medium of your choice. Apply adhesive around the edges of the white piece and wet glue on the trees and lamp post and attach the light blue cardstock behind the white so it covers the opening and creates a “sky background.”
2. Attach the peace words with wet glue and trim off the over-run on the edges. Attach the 2 small pieces of yellow into the top of the lamp post (in the small bag with the deer and dot for joy on 2nd card). Layer to the black card and then to the front of the card.
3. To create the falling snow effect, use a white pen and make small dots. A POSCA pen was used for the sample.

Joy Card

1. Apply wet glue to the back of the gold frame piece and attach the green patterned paper piece to the back of the gold frame. Piece in the pieces of the red poinsettia – adhering with wet glue.
2. Layer the poinsettia piece to the light green piece and then to the black card. Attach the joy words with wet glue as show and trim and excess off the sides. Attach the dot for the “j” with wet glue (in the small bag with the deer and light post yellow pieces). Layer to front of card.
3. Apply wet glue to the center of the poinsettia and add the yellow “prills” to the glue and allow to dry.

Merry Card

Copic markers used: YG61/63

1. Color the trees with the Copic markers listed or the coloring medium of the your choice. If desired, apply a little brown ink to the edges of the small deer (Distress Brushed Corduroy was used in sample).

Stamped Designs Winter Wonder Class

2. Apply adhesive around the edges of the white piece and wet glue on the trees and attach the light blue cardstock behind the white so it covers the opening and creates a “sky background.”
3. Attach the “merry” words to the piece with wet glue and trim off the excess from the sides. Layer to the black card and then to the front of the green base card.
4. To create the falling snow effect, use a white pen and make small dots. A POSCA pen was used for the sample. Attach the deer as shown with foam squares.
